

Vehicle Detection System

Model AL155

- ** You will always receive an early warning of unexpected visitors
- ** The portable, wireless chime may be taken to any room
- ** Small business owners are alerted of arriving customers
- ** Farmers are warned of vehicles entering barn and shed lanes

AutoAlert will not respond to animals, birds etc. The AutoAlert sensing probe buried in or beside your driveway, **only detects the metal of a vehicle** as it moves by. You are then alerted by your wireless chime with a pleasant tone. The portable chime may be used in any room, the backyard or even pool side. Optional chimes may be purchased to alert you throughout your house.

Auto Alert model AL155 includes:

- Auto Alert Controller with power adapter
- Sensor probe with direct burial wire
- Portable, Wireless Chime
- Extra chimes and accessories are available
