

Wireless Entry Alert System

No more missed visitors, customers or deliveries! The Wireless Entry Alert serves as a welcome chime or perimeter alert for your home, business, shop, pool, yard, shed, etc.

The Optex Wireless Entry Alert System can be installed anywhere easily and quickly with no wiring. The weatherproof sensor mounts easily on trees, posts, walls, ceilings etc. and has two detection patterns: 50 ft long range or 17 ft fan pattern. When the sensor detects a person or car it sends a wireless signal up to 1000' away to the receiver. The receiver alerts you with your choice of three different chime sounds, and also features volume control, low battery indicator and a relay output to operate a variety of accessories. Each receiver can manage up to 12 sensors.

Accessories

SENSOR
 Extra Sensor/Transmitter for other driveways, backyard, pool, shed etc.

RECEIVER
 Extra Receiver to alert you in other areas of the house, workshop, etc.
