

New! Video Surveillance Camera Disguised as a Light Bulb!

SecureView is safer than wireless. It's 'near-wireless' and uses the existing wires in your building.

All you need is a light socket and a TV and you have an instant home or office live motion, video surveillance system!

SecureView - Power Line Peace of Mind™

- no finicky antenna
- high quality, sturdy design
- impressive screen resolution
- long camera range
- doesn't broadcast video in the public air waves
- uses your home's wiring
- no need for professional installation
- no drilling, wiring, or special mounting

- needs no tools to install
- moves easily...in seconds
- take it with you wherever you go: room-to-room or house-to-house
- works with any TV or VCR
- great indoors and outdoors
- even videos in pitch darkness
- installation and operation couldn't be easier!
- 90-day guarantee

INSTALLATION IS EASY!

- 1 screw the camera into your light socket
- 2 connect the RCA cable into any TV or VCR
- 3 plug the decoder into your wall outlet

And you're ready to go!

Product includes:

- camera disguised as a light
- decoder to plug into wall
- RCA cable to plug into TV/VCR

Monitor your home or business...day and night

TV not included

Use Secureview as a baby video monitor or to watch your front door!

If you own a truly wireless video camera, it may be doing you more harm than good!

An Eyewitness News Consumer Alert, reveals that the wireless surveillance camera you installed may broadcast your private home video beyond the perimeter of your house. These signals can be legally intercepted by unscrupulous individuals using readily available electronic devices.
