

## SURE ACTION PRODUCTS

SU-P5050 Standard Probe

### The Probe

- For lighting and annuciation along a private road to detect incoming vehicles.
- For free exit gate control.
- To announce the removal of a gun from a rack.
- To "see" a wheelchair for home automation applications.
- To detect the removal of baskets and archeological artifacts. (Eg. By placing a magnet in the container)

SU-P8000 Directional Probe

### The Directional Probe –The Ultimate Vehicle Detection System

The Sure Action Directional Probe System is a new, innovative concept in vehicle motion detection. Finally, a probe system exists that can determine the direction a vehicle is traveling. The Sure Action's Directional Probe System includes:

- Probe Processor (SU-212)
- Directional Probe(SU-8000) **OR**
- 2 Standard Probes (SU-P5050)

Standard Pulsor  
Enhanced Pulsor

### The Pulsor - For Security and Automation

The Pulsor is a motion/presence detection device that responds to the physical flexing of the material on which it is mounted. (i.e. floor joists, cantilever decking, roof rafters, picture frames, etc.) The flexing of the material triggers a voltage signal in the master processor that, in turn, activates the alarm. The sensitivity of the Pulsor can be adjusted so that, if the installer wishes, the system can be set to pick up the weight of an adult but not a 60 lb dog. In a house, the typical area covered by a Pulsor is a 4' x 7' oval.

### **SU-111**

Single zone Processor

### **SU-313**

Three zone Processor

### **SU-212**

Directional Processor

### Processors

There are three different processors. The single zone SU-111 Processor can be used with one probe, up to two 8000 Series Pulsors or up to four 4000 Series Pulsors. The three-zone processor can be used with up to three probes, six 8000 Series Pulsors or up to twelve 4000 Series Pulsors. Sure Action's SU-212 Probe Processor can be used with one Su-P8000 or two SU-P5050 probes for responses based on the direction a vehicle

SUMG44C  
SUMG48C

### Marine Guard Security System

**Prepackaged system ideal for yachts, houseboats and boats with open cockpits.**

- Security only.
- Controlled by wireless transmitter.
- Siren output.
- Invisible system.
- Pulsors mounted under the decking detects people's weight.
