

New!

Wireless Rubber Hose Alert from Dakota Model WRH3000

The all new **Wireless Air Hose Drive Alert 3000** uses the standard air hose to detect cars entering your driveway. It has a wireless range of an incredible 3000', built in chime, timed relay output and many other advanced features!

Like all of our other driveway systems, we have a large assortment of accessories that can be used in conjunction with the **Wireless Air Hose System**, to expand and enhance the system.

The WRH-3000 is a very reliable and easy to install driveway alarm. The transmitter operates on one 9 volt battery and has 25' of 3/ 8" diameter exterior hose that will lay across the drive. When a vehicle drives over the hose a signal will be sent to the WR-3000 receiver **up to 3000' away***. The transmitter is weatherproof and meant for exterior locations. Up to 4 zones can be monitored with additional transmitters. The transmitters can be programmed so they will each sound a different tone at the receiver.

The WR-3000 is the receiver for the WRH-3000 system. The WR-3000 plugs in to a standard wall outlet and can be placed on a table or mounted on the wall. When the receiver gets a signal from the transmitter one of 4 different tones (Classical, Westminster Chime, Ding Dong, Whistle) will sound for a few seconds. There is also a volume control.

Alert 3000 Components- all types of transmitters can be used with the same receiver!

	<p>Extra WR-3000 Receivers may be added to any of the 3000 systems. The WR-3000 plugs in to a standard wall outlet and can be placed on a table or mounted on the wall. When the receiver gets a signal from a transmitter one of 4 different tones (Classical, Westminster Chime, Ding Dong, Whistle) will sound for a few seconds. There is also a volume control so you can set the sound to the desired level.</p>
	<p>Extra Hose with Transmitter for the Wireless Air Hose Drive Alert 3000 detects cars entering your driveway. It has a wireless range of an incredible 3000'. The WRH-3000 is a very reliable and easy to install driveway alarm. The transmitter operates on one 9 volt battery and has 25' of 3/ 8" diameter exterior hose that will lay across the drive.</p>
	<p>InfraRed Sensor / Transmitter for the Wireless Motion Drive Alert 3000 detects people and cars with an incredible wireless range of 3000'. The transmitter operates on one 9 volt battery and is easily mounted on a tree or post near the drive. The transmitter uses a passive infrared (PIR) beam to detect people or vehicles out to about 80 feet then send a radio signal back to the WR-3000 receiver up to 3000' away*.</p>
	<p>Probe/ Transmitter for the Wireless Probe Drive Alert 3000 detects just cars and vehicles with an incredible wireless range of 3000'. The WPA-3000 is an extremely reliable driveway alarm that is for vehicles only. The transmitter operates on one 9 volt battery and a burial wire connecting the probe to the exterior case. The magnetic metal sensing probe is buried along side the driveway and will detect vehicles passing by within about 10 to 12 feet.</p>
	<p>New! Wireless Pager/Receiver WPR3000. The WPR3000 Pager receiver beeps and vibrates to alert you of visitors. Use with any of our Dakota 3000 Systems! With the small size and rechargeable battery, you can take the WPR-3000 everywhere you go. The rechargeable Li-Ion battery will hold a charge for up to 10 days. In addition to the LCD display the PR-3000 will also give an audible tone for each zone and a vibrate alert for times when you need the receiver to be silent. Perfect for small businesses and rural settings.</p>
	<p>New! Universal Transmitter WUT3000. The UT-3000 operates on a standard 9 volt battery and has several different methods of activation. First, the UT-3000 has a push button that can be used as a panic button or a wireless doorbell transmitter. The UT-3000 also has terminals for either a normally open (N/O) or normally closed (N/C) input. These inputs can be used with any detector contacts, such as motion sensors, door switches, temperature sensors, water detectors etc.</p>
	<p>New! Indoor Infrared Transmitter WIR3000. The passive infrared detector is able to monitor an area up to 100 degrees wide. This can be narrowed down to 20 degrees , or any degree in between, with the integral mask. The swivel mount makes it simple to adjust the sensing range from right to left, up to 80 degrees, and up and down up to 50 degrees. There are also three different sensitivity settings, allowing detection of a person up to 12, 25 or 40 feet away. Operates on a 9 volt battery.</p>
