

What *our* Customers Say . . .

Peace of Mind

"With your FreezeAlarm unit, I was able to hourly monitor the temperature and pinpoint the hour of repair . . . Without this convenience, I would have had a rather trying and nerve racking day."

Moore, South Carolina

No Installation

"Your product worked wonderfully. I was so impressed with its ease of use, I gave one to a friend with a lake cabin."

Minneapolis, Minnesota

No Monitoring Fees

"I have a lot more control with a FreezeAlarm than with a monitored service, and I don't have to pay the monthly fee."

Graniteville, VT

Flexible

The HeatAlarm set up easily, was accurate and notified me early enough to save over \$10,000 in frozen food at our resort.

Orlando, FL

Peace of Mind No Monthly Fees, Affordable...

Applications

Prevent Frozen Pipes

Protect your home or vacation property from the damage caused by frozen, burst pipes. Use the FreezeAlarm to alert you by phone of a drop in temperature in your home while you're away.

Change the Temperature by Phone

Gain both convenience and temperature protection using our Freeze and HeatAlarms in your vacation property. Deluxe models allow you to turn up and down the temperature by telephone.

Failed Air Conditioning

Elderly people, pets, computers, your home and even plants can suffer if air conditioning fails. Rising humidity due to failed air conditioning helps mold grow and contributes to computers and servers failing quickly. Our HeatAlarms allow for quick response to these problems by calling you before disaster strikes.

Freezers & Refrigerators

Don't worry about spoiled meat or melted ice cream. Our HeatAlarms will call you if the temperature gets too high in your freezer or refrigerator. Use our Auxiliary Temperature Alarm to monitor more than one location using a single FreezeAlarm.

Agriculture

Monitor the temperature in animal containment buildings, greenhouses and barns to prevent costly loss of livestock, plants or flowers.

Water Detection

You can plug in our WaterAlarm™ and be alerted if water is detected on a floor or rising too high in a sump pump or pool. Save your home before water wrecks your walls, carpet and furniture.

Other Quality Products

From HeatAlarms to back-up battery systems, Protected Home offers a wide variety of products to make your alarm work more effectively and work best for your application.

HeatAlarms

Rising temperatures can cause just as much damage as falling temperatures. Our line of HeatAlarms alerts you if the air conditioning fails, if the power goes out or if your refrigerator or freezer has quit working. Prevent mold from growing and protect your pets or elderly relatives with a HeatAlarm that will alert you by phone of rising temperatures in a home. Keep food from spoiling or prevent computers from overheating by installing a HeatAlarm. The three HeatAlarm models are very similar in feature to the three FreezeAlarm models. Refer to the FreezeAlarm feature chart for general features of each HeatAlarm model.

Power and Phone Accessories

Complete your alarm installation with accessories to help ensure your product is protected from damaging power surges through the power or phone lines. Add our Rechargeable Cyber Power Back-Up battery system for extended back-up power during a power failure. We also offer 9 volt lithium batteries and telephone accessories that make any installation easy and affordable.

Security Alarms

Home and cabin monitors that call you

Peace of Mind

Your home, vacation property or business is a valuable asset you shouldn't have to worry about while you're away. Bad weather, power loss, faulty heating or air conditioning and leaky pipes or appliances can cause significant damage to your home or business. Our line of products offer an affordable solution, assuring you peace of mind while you're away. FreezeAlarms, HeatAlarms, WaterAlarms and MiniAlarms will automatically call up to three phone numbers to alert you of falling or rising temperatures, water emergencies or if intruders have broken in. Protect your valuable asset with remote monitoring products from Protected Home.

No Installation or Monitoring Fees

Installation is as simple as plugging in a phone line. Most of our products literally talk you through programming of phone numbers and temperature settings. All of our products automatically call you when there is a problem, so there is never a monitoring fee or service contract.

Change Temperature by Phone

Don't wait a day to heat up or cool down your vacation home. Simply call your FreezeAlarm or HeatAlarm and change the temperature before you arrive.

Affordable Protection

All of our alarm products provide peace of mind at an affordable price. With multiple models to choose from, every home owner can enjoy the protection our products offer in their primary home, a second home or to monitor a refrigerator, freezer, garage or apartment. Many insurance companies also offer premium discounts for installing our alarm products.

DELUXE FA-D2

Freeze protection and the ability to heat up your cabin by telephone! The Deluxe model also accepts additional alarm sensors such as our waterAlarm™, or a motion sensor for security.

INTERMEDIATE FA-I-CCA

Most popular model! Calls three phone numbers if the temperature drops or power fails. You can also remotely check the temperature and power status from any phone in the world.

BASIC FA-B-CCA

Automatically calls one telephone number when the temperature drops below 45°F (7°C) and plays an alarm message to the answering machine or person answering the call.

Feature	Deluxe FA-D2	Intermediate FA-I-CCA	Basic FA-B-CCA
Temperature range FreezeAlarm will monitor	-66° to 301°F (-54° to 149°C) Reads in either °F or °C	-66° to 301°F (-54° to 149°C) Reads in either °F or °C	Pre-set at 45°F (7°C) or at 85°F (34°C)
Calls you during a power failure	Calls out on power failure with a selectable delay of 0 to 120 minutes	Calls out on power failure with a selectable delay of 0 to 120 minutes	Will not call on power failure, but will still operate during power outage

Security to prevent unauthorized access	Yes, four digit user selectable code	Yes, four digit user selectable code	Not Applicable
Selectable pulse or Touch-Tone™ dial-out	Yes	Yes	Touch-Tone™ only

WaterAlarm Plus (WA-5000)

The WaterAlarm Plus will call to warn you of leaking pipes, appliances, burst pipes or overflowing sumps. If water is detected by the water sensor, an 85 decibel alarm will sound and the unit will begin calling one telephone number to warn you of a water emergency at your monitored location. The WaterAlarm Plus will continue to call the one phone number and play a factory recorded alarm message until someone calls and cancels the alarm call-out. Add more sensors to cover larger areas.

Water Alarms (WA-02 & WA-20)

Our easy to use Basic WaterAlarm (WA-02) will sound an audible alarm when water is detected. Sensor can be extended up to 1,000' (304m) from the audible alarm unit. The Deluxe WaterAlarm (WA-20) will also close an alarm contact so it can be plugged into our Deluxe FreezeAlarm or another alarm system.

MiniAlarm Plus (MA-5000)

The MiniAlarm Plus will continually call one phone number to warn you if intruders have been detected by the attached infrared motion sensor. The 130 decibel siren will send intruders running.

MiniAlarm Motion Sensor (MA-S01)

The MiniAlarm motion sensor will sound a 130 decibel audible alarm if motion is detected by the infrared sensor. The MiniAlarm can be used alone or plugged into our Deluxe Freeze or Heat alarms to trigger an alarm call if the sensor detects intruders.

Security Decals, Yard Sign and Cameras

Keep the intruders away with our security decals, yard signs and fake security cameras.
