Patents Pending

The **Oracle Wireless Intercoms** are the product of the most sophisticated wireless voice intercom technology available today. These completely wireless digital intercoms not only deliver the crisp clarity that UWS customers have come to rely upon, but they also offer the ability to open doors and gates that are controlled by the Oracle Pro Door & Gate Systems. These units not only provide command for the gate, they also have our *Echo* feedback feature to confirm that your directions were received and acted upon.
