Sensaphone® 2000 System Provides 24-Hour-A-Day Monitoring for Applications in Truck Stops, Fuel Stops, Interstate Travel Centers, and Turnpike Plazas

Facility operators can install Sensaphone 2000 monitoring and reporting technology to achieve necessary around-the-clock security and remote access to information to prevent troublesome and expensive downtime.

ASTON, PA — Sensaphone, Inc., a pioneer in remote monitoring and control systems, recommends its Sensaphone® 2000 system to operators of truck stops, fuel stops, interstate travel centers, and turnpike plazas. The 2000 allows for easy monitoring of these sites 24-hours-a-day, 365-days-a-year.

By employing the Sensaphone 2000 system, owners and operators can achieve added security and maintain peak operating performance of their facilities that are open all day, every day. In addition to monitoring security for open windows and doors to alert for intrusion, Sensaphone 2000 systems allow for the identification of potential problems before they become emergencies, by monitoring fire and smoke alarms and power failures. Operators are alerted to take appropriate action to minimize or prevent damage, repair costs, disruptions, and downtime.

Furthermore, Sensaphone 2000 reporting and monitoring capabilities afford great flexibility to owners of interstate travel centers and fuel stops, for example. The technology allows operators to receive notification of problems and solicit reports from any location at any time. The system can distribute data reports and alarm messages via fax machines, e-mail addresses, or computer modems; and alarm messages to numeric and alphanumeric pagers as well. In addition, Sensaphone 2000 collects, stores, and sends data from network servers and such for real-time reporting.

“The Sensaphone 2000 system can pay for itself in reduced downtime with its first alert call,” said Pete Ferry, Technical Service Supervisor at Sensaphone, Inc. “And the systems are designed for the user’s convenience. With its feature capabilities such as extensive data-logging and flexible dial-out, Sensaphone 2000 automates and simplifies many activities and improves overall operations. And ultimately, operators provide a higher level of service to their customers.”

About Sensaphone 2000

Sensaphone 2000 can report on up to eight (8) remote, analog or digital conditions, including room temperature, outside temperature, humidity, tank levels, tank temperature, pressure, flow rates, flooding, and HVAC controllers, plus power failure. It can be programmed to communicate with up to 32 destinations to deliver alarm messages or status reports in real-time, and user programmability allows customization. Sensaphone 2000 also has extensive built-in data-logging features capable of storing up to 32,000 records. It has the most flexible dial-out

capabilities of all Sensaphone models—from any combination of telephones, fax machines, pagers, e-mail accounts, or computers.

About the Sensaphone Product Line

There is a Sensaphone model for almost any application. The product line includes:

- IMS-4000 Infrastructure Monitoring System for networks, servers and equipment;
- Sensaphone SCADA 3000 (the first low-cost, integrated SCADA monitoring & control system);
- Sensaphone 2000 (for advanced monitoring with 8 universally configurable inputs and data logging);
- Sensaphone Express II (for comprehensive monitoring with up to 48 dialout numbers, up to 40 input channels, and real-voice alarm dialout); and,
- Model 4100, Model 1108, and Model 1104 (for low-cost, comprehensive monitoring).

About Sensaphone, Inc.

Sensaphone, Inc. stands at the forefront of remote monitor and control solution design, setting industry standards for advancements in technology. Its family of Sensaphone products provides a comprehensive line of feature-rich, flexible technology for monitoring equipment, safeguarding property, and reporting critical data. Sensaphone, Inc. serves a broad range of applications/industries, including telecommunication, network servers, computer rooms, oil & gas, water/wastewater, HVAC & refrigeration, science/health labs, agriculture, greenhouses, and vacation homes.
